

Creating Microservices for account and loan

Account Microservice

File: src/main/java/com/cognizant/account/AccountController.java

```
java
```

```
package com.cognizant.account;
```

```
import java.util.HashMap;
```

```
import java.util.Map;
```

```
import org.springframework.web.bind.annotation.GetMapping;
```

```
import org.springframework.web.bind.annotation.PathVariable;
```

```
import org.springframework.web.bind.annotation.RestController;
```

```
@RestController
```

```
public class AccountController {
```

```
    @GetMapping("/accounts/{number}")
```

```
    public Map<String, Object> getAccountDetails(@PathVariable String number) {
```

```
        Map<String, Object> account = new HashMap<>();
```

```
        account.put("number", number);
```

```
        account.put("type", "savings");
```

```
        account.put("balance", 234343);
```

```
        return account;
```

```
    }
```

```
}
```

(No changes needed in application.properties — Account runs on default port 8080)

Loan Microservice

File: src/main/java/com/example/loan/LoanController.java

```
java
```

```
package com.example.loan;
```

```
import java.util.HashMap;
```

```
import java.util.Map;
```

```
import org.springframework.web.bind.annotation.GetMapping;
```

```
import org.springframework.web.bind.annotation.PathVariable;
```

```
import org.springframework.web.bind.annotation.RestController;
```

```
@RestController
```

```
public class LoanController {
```

```
    @GetMapping("/loans/{number}")
```

```
    public Map<String, Object> getLoanDetails(@PathVariable String number) {
```

```
        Map<String, Object> loan = new HashMap<>();
```

```
        loan.put("number", number);
```

```
        loan.put("type", "car");
```

```
        loan.put("loan", 400000);
```

```
        loan.put("emi", 3258);
```

```
        loan.put("tenure", 18);
```

```
        return loan;
```

```
    }
```

```
}
```

File: src/main/resources/application.properties

server.port=8081
